Beyond the Veil Prophetic Ministries Program Schedule Guide

**“Declaring
God’s Glory
& Revival to
the Nations.”**

Hello Everyone:

As we approach the New Year, we are continually excited the Holy Spirit is enlarging our boarders to the Nations! I would like to thank each of you for your labor of Love to the Nations, and the unity that has been evident in each of you among the team. What a blessing!

With our growth, the Holy Spirit has given me other revelations to reach more Nations.

Below are a few goals:

- 1. Those in 3rd world Nations will be able to come aboard even though their Internet provider is not stable. I will continue to offer the ability to load pre-recorded messages and still have our panel present. As well, many ministers in 3rd world Nations have more reliable internet connection on their cell phones, but their applications do not support SKYPE. This is where; our HOSTS will be connecting directly into their cell phones with free voice messaging through Yahoo Messenger.**

****This is in a test period as we hope to connect with Dr Ansar and Pastor Human from Pakistan.**

- 2. I have been looking, behind the scenes, where each of your programs will be heard on a regulated FCC channel on hand held satellite radio devices. This will allow each of your ministries to be heard in greater areas, across the Nations. New doors will be opening up to preach the Gospel through your ministry!**
- 3. Through the help of Brother George, I have found a way to make each of your books available for copyright and published in Amazon.com free! Your books will receive a traditional copyright, and your books can be purchased internationally. Amazon will receive 35 % royalties and you keep the rest. (**This is what I am understanding this point.) I would suggest taking 1 message a month and trying this service out, for starter. Continue to keep your messages original. Please remember, if you are teaching from a book there are copyright laws, so please let us know in the beginning of your message so our transcribers do not copyright your message.**
- 4. Webhosting: I have found a place on the Internet that offers free unlimited webhosting. Even though it is a sub domain, we want to keep our ministry free of**

debt in every way. The vision for this page is to have an organized place where each of your schedules will be in one place, where viewers and listeners can click, listen, and see our program schedule. As well, your messages will be streamed live; archived messages will be made available from your ministry at the click of the link.

I have put this off but Prophet Ronald has suggested this, and I think it is time to do this. I am not a great website creator, but I will give it my best shot😊

5. Please continue to be on time to your programs as HOSTS are standing by to stream your program. We realize that everyone's schedule is busy and would appreciate notice that you cannot make it, so be sure to drop us a line in the Team Page or a personal message through electronic mail.

Program Schedule Guide
